Spring 2010

Geography of Arid Lands
GEOG 4023
GEOG 5023

Tue Th 12:30-1:45 118 CLB
Instructor: Carlos E. Cordova

General topics
Arid and semiarid lands of the world, climate and water balance, geomorphic processes, biogeographic aspects, response to climate change, human transformation of drylands since the Neolithic, arid land management case studies

The course includes lectures, topic discussions, movies and creative activities. A fieldtrip to the Dust-Bowl region is optional for extra-credit as long as we have enough students interested.
